

DNM3K 72 g/M²

- 52% Cellulose / 48% PES
- White Creped Spunlace Material

DNM3K is an absorbent creped non woven fabric manufactured from a blend of cellulosic and synthetic fibers. This strong, absorbent substrate is suitable for a range of hard surface and delicate wiping applications and solvent cleaning.

This Latex free fabric is soft, highly absorbent and has excellent strength characteristics ensuring its versatility and low lint properties.

Physical properties

Tests	Orientation	Units	Targets	Methods
Basis Weight		g/M ²	72	ASTM D3776
Thickness		mm	0.47	ASTM D1777
Tensile Strength	MD	N	157	ASTM D5034
Tensile Strength	CD	N	81	

Functions

Tests	Units	Targets	Methods
Extrinsic absorption rate	ml/m /s	1500	IST 10.2-98
Extrinsic absorption capacity	ml/m ²	408	IST 10.2-98
Absorption capacity	%	500	ERT 10.3-99
