Elongation at break	MD	%	37	ISO9073.3
Elongation at break	CD	%	101	ISO9073.3

Functions

This well known Blue Tack rag was especially developed to be used on the paint lines of Europe's OEM manufacturers, it has a fine apertured structure to capture dust particles, has a blue base colour to distinguish from other cloths and has an impregnation that doesn't dry out due to its unique solvent free formulation. Leaves no smearing nor deposits on surface. Is widely used since several years in various sizes.
