

XM3 Blue Sealant Wiper

- 50% Viscose / 50% polyester
- Blue Apertured Non Woven Material

This Non Woven wiper is used since several years as a standard sealant and solvent cleaning wiper within the automotive OEM industry.

Its apertured structure allows the PVC compound to penetrate into the structure of the wiper whilst the fibers absorb without leaving any lint on the surface.

Physical characteristics

Tests	Orientation	Units	Targets	Methods
Basis Weight		g/M ²	52	ISO9073.1
Thickness		mm	0.62	ISO9073.2
Density		g/dm ³	103	
Tensile Strength	MD	daN	7.7	ISO9073.3
Tensile Strength	CD	daN	2.5	ISO9073.3
Elongation at break	MD	%	37	ISO9073.3
Elongation at break	CD	%	101	ISO9073.3

Functions
